

WORK SMARTER, FASTER, AND SAFER WITH SURFACE & INTEL

Business-friendly
design meets powerful
PC performance

Imagine a device that thinks as fast as you do, adapts before you even realise you need it, and transforms work from a challenge into an art form. This is not the technology of the future—it's here, now. Surface and Intel® have redefined productivity, and what comes next will revolutionise how your team works, creates, and wins.

Power Meets Precision

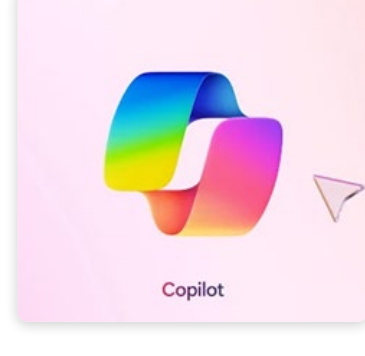

Intro: Experience unparalleled productivity with Surface devices powered by Intel® Core™ Ultra processors. With AI-driven precision from Copilot and the versatility of Windows 11 touchscreens, your team can seamlessly adapt to any task, enhancing both efficiency and creativity.

- Surface devices + Intel Core Ultra = **Unmatched productivity**
- Intel® Core™ Ultra + Copilot = **AI-driven precision**
- Windows 11 + Touchscreens = **Unprecedented versatility**
- Transforming form factors = **Unique adaptability**

Turbocharged Performance

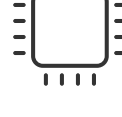

Experience a significant boost in performance with Intel® Core™ Ultra processors. Optimised for Copilot, these processors enable AI-enhanced multitasking and powerful integrated graphics that cater to both professional workloads and recreational activities, ensuring your team stays ahead of the curve.

Up to **42% faster performance.**

AI-enhanced multitasking keeps your team efficient.

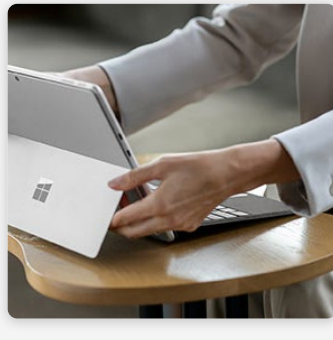

Powerful integrated graphics that are great for professional and recreational use.

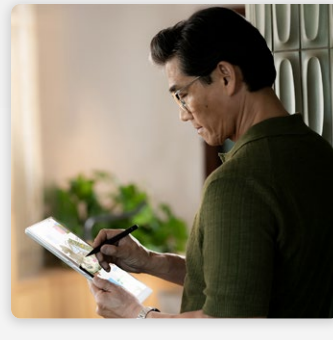

Intel® Core™ Ultra processors are optimised for Copilot

Effortless Mobility

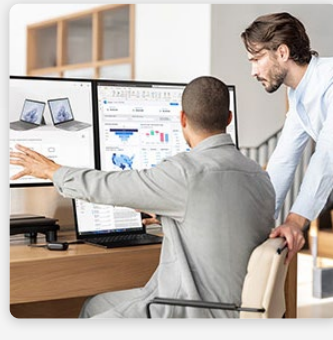

Designed for the modern professional, Surface devices offer lightweight, durable designs that transition seamlessly between laptop, tablet, and studio modes. Enjoy quiet operation to provide a distraction-free working environment. Their slim and sleek profiles make them ideal for on-the-go productivity, whether you're in a café or a meeting room.

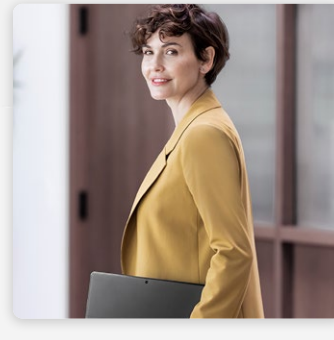

Lightweight, durable designs fit any workspace.

Flexible modes: laptop, tablet, studio.

Quiet operation for distraction-free working in any environment.

Slim & sleek profile makes them easy to carry around.

Rock-solid Security

Intro: Intel-powered Surface devices come with advanced hardware security features to protect your data. From TPM 2.0 and biometric login to BitLocker encryption and a dedicated security processor for boot-up and firmware protection, these devices secure your information, ensuring peace of mind.

- Intel-powered Surface devices come with advanced hardware security.
- Data stays safe with TPM 2.0 and biometric login.
- BitLocker encrypted protection for local files.
- Dedicated security processor protects boot-up and firmware.

Productivity Anywhere

Stay connected and productive from anywhere with Surface devices featuring Intel Wi-Fi 6 and 5G-ready models. Enjoy longer uptime with AI-enhanced battery life and robust connectivity that keeps you in touch with your team, no matter where you are. These features empower you to work confidently from any location.
